2. China Implemented the New Standard for Rapeseed Oil on 1 May 2022

In October 2021, the Chinese government approved the issuance of *GB/T1536-2021 "Rapeseed Oil,"* and the new standard was implemented on 1 May 2022. Currently, rapeseed oil is internationally divided into three categories while the new standard is dividing it into two: in accordance with the different processing extent, rapeseed oil is separated into crude rapeseed oil and finished rapeseed oil. In addition, it is separated into regular rapeseed oil and canola oil based on the erucic acid content.

Canola oil is rapeseed oil that contains no more than 3% of erucic acid content in the fatty acid composition, and the erucic acid content index is consistent with the current China

national standard. The definitions between pressed rapeseed oil and extracted rapeseed oil are more precise, which are based on the variance in the preparation process of the crude rapeseed oil. Nonetheless, both are "refined and processed," which help consumers to scientifically distinguish the differences between pressed oil and extracted oil.

STC provides a full scope of food testing services. For inquiries, please contact us at hkstc@stc.group.

中国于 2022 年 5 月 1 日实施《菜籽油》新标准

2021 年 10 月，中国政府批准发布 GB/T1536-2021《菜籽油》，新标准于 2022 年 5 月 1 日实施。现行国标将菜籽油分为三类，新国标则分为两类：菜籽油按加工程度不同分为菜籽原油和成品菜籽油两类；按油菜籽中油的芥酸含量分为普通菜籽油和低芥酸菜籽油。

低芥酸菜籽油为 "脂肪酸组成中芥酸含量不超过 3% 的菜籽油"，芥酸含量指标与现行国标保持一致。压榨菜籽油与浸出菜籽油的定义更加清晰，区别在菜籽原油的制取工艺不同，但都要进一步 "经精炼加工制成"，有助于消费者科学认知压榨油与浸出油的异同。

3. CNCA Announcement on Specifying the CCC Standards for Explosion-proof Electrical Products

In accordance with the China Compulsory Certification (CCC) system, GB/T 3836.1-2021 Explosive Atmospheres Part 1: Equipment — General Requirements, 8 new China national standards, which revised and consolidated the 12 old standards, were implemented on 1 May 2022.

They involved the CCC Standards for Explosion-proof Electrical Products. In order to ensure the effectiveness of implementing the CCC system, the details are as follows: -

a) Revision was made to the list of the basis and standards for certification in the *China Compulsory Certification Implementation Rules - Explosion-proof Electrical Products (CNCA-C23-01: 2019).* However, the revision did not change the scope of the China Compulsory Certification.

b) All designated certification institutes should follow the instructions of the CNCA's Announcement on Relevant Requirements for Revision of Compulsory Product Certification Basis Standards (Announcement No. 4 [2012] of CNCA), and implement the CCC product certification for Explosion-proof Electrical Products according to the new

China national standards.

STC's CCC-accredited testing laboratories located in Hong Kong, Dongguan and Shanghai provide testing reports for China's domestic market access on products such as toys, solvent-based coatings for woodenwares, and electrical and electronics products.　For details, please contact us at hkstc@stc.group.
